

BILZ ANTI VIBRATION TECHNOLOGY

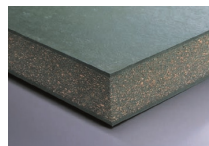

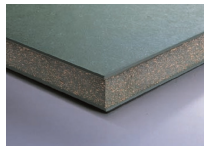

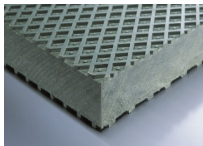

*We are Pioneers to introduce **Anti Vibration Mounts** as a concept in India as an alternative solution to Civil foundation, Since 1995*

Bilz Anti Vibration Mounts are perfect solution for absorbing impact generated by Press machines during each stroke.

For Press Machines we recommend

1) Bilz Insulating Plate

- B 5
- B 30
- B 32

2) Precision Wedge Mount, PKA Series.

- ◆ PKA Series provides leveling accuracy upto ± 10 microns.
- ◆ PKA Series are provided with Insulating Plates.
- ◆ Insulating Plates selection will be depend on Machine Weight, Foot size and Stroke per min.
- ◆ PKA Series will reduce vibration upto 60% to 70%

3) Leveling Element, BNSH Series

- ◆ BNSH series provides leveling accuracy upto ± 50 microns.
- ◆ BNSH Series are also provided with Insulating Plates.
- ◆ BNSH series are mostly Suitable for Small Size Press machines

4) Rubber Air Spring , FAEBI

- ◆ Highly efficient for isolating impact.
- ◆ Reduce Structure Borne Noise.
- ◆ Best Suitable for High Speed Press.
- ◆ 3 bar to 5bar Pressure required.

Successful Installation on

- * SINGHAL
- * ISGEC
- * MAKOO
- * SWASTIK
- * AMCO
- * SAMRAT
- * SEYI
- * RUBI
